Abstract: Here we are talking about sharing knowledge both indirectly and openly. Here we are using theory of planned behavior and structural equation modeling to analyses. Non family firms and family firms are compared in contrast in the setting of knowledge sharing. Knowledge sharing in family firms is found more than in family firms than non family due to the willingness of family Chief Executive Officers or Hospital Administrator, as it is their own blood. Hence Approach scores well in family firms second subjective norms followed by PBC.

Key words: Knowledge sharing, family firms and non-family firms.

1. Introduction

Knowledge sharing has to be carried out both in private and family owned firms. Knowledge transfer is essential to managing a small family firm’s private organizations as well.

Knowledge transfer is the businesses’ ability to exchange knowledge (Goh, 2002; Smith and Rupp, 2002) and is important for family business continuity after progression has occurred (Poutziouris and Chittenden, 1996). Minbaeva et al. (2003, 587) define knowledge transfer as “a process that covers numerous stages starting from recognizing the knowledge over the actual process of transferring the knowledge is finally used by the receiving unit.” Knowledge transfer has been identified as the one of the top three issues in family, along with taxation and finding the right successor (Malinen, 2004).

2. REVIEW OF LITERATURE

<td>2012</td>
<td>Management practices across firms and countries. <em>Academy of management perspectives</em> (2012)</td>
<td>Bloom, N., Genakos, C., Sadun, R., &amp; Van Reenen, J.</td>
<td>One factor linked to this variation is ownership. Government, family, and founder owned firms are usually poorly managed, while multinational, dispersed shareholder and private-equity owned firms are typically well managed. Stronger product market competition and higher worker skills are associated with better management practices. Less regulated labor markets are associated with improvements in incentive management practices such as performance based promotion.</td>

<td>Resilience in family firms: a theoretical overview and proposed theory. <em>International Journal of Management and Enterprise Development</em>, (2020)</td>
<td>Ventura, M., Vesperi, W., Melina, A. M., &amp; Reina, R.</td>
<td>This article uses a literature review to study the research areas of organisational resilience in family firms, during the generational change. The study offers a theoretical overview to explain on these themes. Our evidences show that the academic literature has reached a shared consensus on the importance of organisational resilience.</td>
</tr>
<tr>
<td>12</td>
<td>2020</td>
<td>Illuminating the space between: investigating interpersonal relationships in family firms through qualitative inquiry. In <em>Handbook of Qualitative Research Methods for Family Business</em>. Edward Elgar Publishing. (2020)</td>
<td>Waldkirch, M.</td>
<td>Interpersonal relationships represent a core element of the fabric of organizations, since they provide meaning for individuals and structure work. Especially in family firms, interpersonal relationships can have long-lasting implications for individuals and the organization. Studying those relationships thus gives new and revealing insights into the family firm.</td>
</tr>
</tbody>
</table>

**Research gap:**

Researcher have carted to family firms and non family firms we have done a contrast on it in
Madurai, Tamil Nadu and this is the gap we have founded from the review of literature.

**Data Collection:**
We have formed questionate with items, we have circulated in hospitals in Madurai-Tamil Nadu.
We have obtained 250 questionaires without any mistake.

**Data interpretation**
To analyze the data we are using structural equation modeling and amous software to analyze the data

In hospital family firms:

**Attitude**

If I share knowledge with other members I feel

1. very harmful [ ] very beneficial [ ]
2. very unpleasant [ ] very pleasant [ ]
3. very bad [ ] very good [ ]
4. very worthless [ ] very valuable [ ]
5. very unenjoyable [ ] very enjoyable [ ]
Subjective Norms

7. Most members think that I should share knowledge with others.
   Strongly Agree □  Agree □  Neither □  Disagree □  Strongly Disagree □

8. Most members who are important to me share their knowledge with others
   Strongly Agree □  Agree □  Neither □  Disagree □  Strongly Disagree □

9. Members whose opinion I value approve my behavior to share knowledge with others.
   Strongly Agree □  Agree □  Neither □  Disagree □  Strongly Disagree □

10. Members whose opinions I value share their knowledge with others.
    Strongly Disagree □  Agree □  Neither □  Disagree □  Strongly Disagree □

Perceived Behavior Control

11. For me to share knowledge is always possible.
    Strongly Agree □  Agree □  Neither □  Disagree □  Strongly Disagree □

12. If I want I always could share knowledge
    Strongly Agree □  Agree □  Neither □  Disagree □  Strongly Disagree □

13. It is mostly up to me whether or not I share Knowledge
    Strongly Agree □  Agree □  Neither □  Disagree □  Strongly Disagree □

14. I believe that there are much control I have to share my knowledge with others
    Strongly Agree □  Agree □  Neither □  Disagree □  Strongly Disagree □

15. Any other comments if you want to share. Please.

In non-hospital family firms:

Attitude
